RE: Docket No. VII-91-H-0025

Dear Ms. Hutchinson:

Recently I sent you the status report for the month of May, 1992 in connection with the hazardous waste investigation being performed by Steelcote and Niedt Realty pursuant to the above-referenced Administrative Order on Consent ("AOC"). Included in the status report were copies of the analytical test results for groundwater samples.

Pursuant to paragraph 26(c) of the AOC, any contaminant of concern not detected in any quarterly sampling period shall be eliminated from future sampling and analysis.

Our review of the test results for the groundwater samples reveals that the following seven contaminants of concern were the only ones detected:

Xylene  
Toluene  
Di(2-ethylhexyl)Phthalate  
Formaldehyde  
Barium  
Chromium  
Lead

PEPER, MARTIN, JENSEN, MAICHEL AND HETLAGE

Ms. Cynthia Hutchinson

Accordingly, in the final three rounds of groundwater sampling, the above seven contaminants of concern will be the only ones subject to analysis.

Please feel free to call either me or Don McQueen if you have any questions.

Very truly yours,

Alphonse McMahon
